Course Overview

Criminology is the study of crime and the social and psychological constructions of crime. As an interdisciplinary social science subject, criminology draws on a range of perspectives, for example: criminal justice, sociology, psychology, law and social policy. Criminology aims to go beyond our common-sense assumptions and explore the complex and contentious nature of crime and criminal justice.

On this course students will explore a number of the following criminological topics including honour-based violence, football hooliganism, gangs, cyber crime, child criminality, immigration and crime amongst other examples. In year two, students are expected to gain industry experience in their chosen area of the Public Services in order to develop industry specific, wider skill-set development that public service employers hold in high regard.
