## Metal Jewellery Making - Progression and Development - Part-time

### In Brief

#### Start Date / Duration

This course is planning to start on 16 January and will run every Thursday for 8 weeks between 6.00pm and 8.30pm (term-time only).

#### Entry Requirements

Students must have attended 1 term of the beginner course available at the college OR be able to provide a sample of work they have done in the past.

#### You will achieve

There is no qualification with this course.

### Course Overview

**Have you previously enrolled on our beginner metal jewellery making course? Have you worked with base metals and fine metals in the past? Do want to continue developing and expanding your skillset?**

This developmental jewellery making course is suitable for students to progress the skills taught on our beginner course and for students with prior experience working with metals such as brass, copper and silver. On this course you will continue to perfect techniques and processes used in jewellery making with the aim of producing wearable items for you to keep. You will be encouraged to add your own creative flair by adapting any design elements to create jewellery with your own aesthetic. Having learnt and practiced some of the techniques of jewellery making in the past, you will have the basis to continue to explore this wide ranging, practical and creative subject and build a unique portfolio of work.

### Course Content

During the course you will be encouraged to explore your own projects and ideas. You will be inspired to generate projects that enable you to develop the core metalworking skills; cutting, shaping, finishing, and soldering metal, all to a high standard. In your projects you will be encouraged to use a variety of processes and techniques such as ringmaking, stone setting, casting, press forming, etching, metal embossing, chain making and wire work.

The class is taught in a specialist 3D design workshop with dedicated bench space for jewellery. Where appropriate you will be making your jewellery in silver and will incur additional costs for silver of between £10 and £50 depending upon the size and quantity of the work you produce. The use of base metals such as copper and brass are free.

## **How will I be assessed?**

## **What Equipment Will I Need?**

You will work in a dedicated silversmithing workshop and all equipment will be provided. A small charge is incurred for any silver you need.

## **Where will I study?**

Old Mill Lane campus  
Church Street  
Barnsley  
S70 2AX

## **What can I do next?**

You could try your hand at one of our other **Art and Design** [<https://www.barnsley.ac.uk/our-departments/art-design-and-fashion/>] courses.

## **How much does the course cost?**

This course costs £230. There is no funding available for this course, so all learners must pay the full fee. You may also need to purchase additional materials to cover the costs of your jewellery.

## **Extra information**

### **Full Fee Payable**

If the course is listed as full fee payable, you will have to pay for the course.
